Restoring health, removing limitations … *…Respecting the healing power of nature*

Welcome to the Clinic.

Following is a thorough intake designed to achieve a comprehensive history. A complete history is a most important tool in formulating a health plan for you. If you come to a question that does not apply or you choose not to answer, just leave it blank and continue with the rest of the intake. If you have any questions please feel free to call the clinic

Please bring to your appointment: **1.**This completed form. **2.** Any remedies (vitamins, minerals, homeopathics, herbs, and drug etc) you are currently taking. **3.** Any relevant test results already completed. **4.** First morning urine in a clean container.

As a large number of patients of this clinic have environmental/chemical sensitivities, the office is a perfume-free zone. We would ask that you refrain from wearing any perfumes on your appointment date.

Before you begin our journey together, I would like to discuss something very important that will have a major impact on your ability to recover and achieve maximum improvement. Many Patients achieve significant improvement while others have become frustrated and failed in their attempt to get well. Naturopathic medicine is much more than eliminating your symptoms – it's about living a life of vibrant health. Any discussion of the correct way to achieve health and stay healthy is: a discussion of how you have lived your life up to this point and how you will live it in the future. Therefore, to help you make significant changes in your present health, I want to ask you a few very important questions. I want you to be honest with yourself and really dig deep inside yourself for the answers.

1. Have you made the decision to change? To do what it takes to get well? **Yes__ No__**

I have read something interesting: "The definition of insanity is to keep doing the same thing and expecting different results". If you keep following the same course of treatment you have been following will you results really change. Have you ever wondered if you are on the right path to achieving optimal health? It may require you taking a different path to reach you destination.

Most people I ask tell me they have made the decision to change. But how many people have truly decided to change? There is a difference between deciding something and having "reasons" to actually do it. When you have made a decision to make a change and you know you reasons, you create an internal power that can propel you to achieving health and wellness. So now I ask: …

2. List up to 5 things that you have been unable to do as a result of your present symptoms. Please be specific. (Use extra pages if necessary)

3. List up to 5 things that you plan to do once you are feeling better. Please be specific. (Use extra pages if necessary)

4. Please check off the following that you would like to achieve with my help:

☐ Have more energy	☐ To feel less sleepy in the afternoon
☐ Sleep better	☐ Lose weight
☐ Have better digestion	☐ Increase my sex drive
☐ Have a better immune system i.e. less colds and coughs	☐ Increase metabolism to burn more fat
☐ Not be dependent on laxatives or stool softeners	☐ I want to improve my memory
☐ Have better muscle tone	☐ I want to be able to be more focused
☐ Be in less pain	☐ I want a better mood
☐ No longer use pain medication	☐ I want to reduce my risk of developing a chronic disease
☐ No longer use allergy medication	☐ I want to detoxify my body
☐ No longer use sleep medication	☐ I want to improve my diet
	☐ I want to clear up my skin
